

BENVITEC  
PLASTICS

***LIGHTWEIGHT PANELS with  
a range of surface finishes  
(HPL, anti slip, PMMA mirror, FRP, color coating, etc.)***

Sandwich panels can be finished ('custom made') with a big range of materials added to the front and/or back.

In addition to their benefits (low weight, strength and stiffness), these panels can be customized to the application, making them an all-round panel.
